## Course Outline

PRINCE2 is a process-driven approach to project management; the processes support each of the main drivers within the project. PRINCE2 is suitable for planning and controlling any type of project, regardless of scope or size. PRINCE2 is increasingly being viewed as a Best Practice methodology and up-to-date knowledge of the method is a must for anyone concerned with modern project management techniques.

The one-day course is delivered in a number of modules, all of which include interactive discussion as the main vehicle for understanding PRINCE2 and its implications.
