

Project Manager Placement

Purpose

To provide a Project Manager to manage one or more projects on the Client's behalf where there is a need for additional capacity or expertise.

Benefits

- Y Extends the capacity of the project management function without an increase in permanent overhead
- Y Complements existing skills
- Y Enables flexible resourcing
- Y Support from a professional project management organisation. Whilst working on a Client site WPM Project Managers have back-up and support from WPM's Management. Should they encounter unusual project issues or requirements, they will be assisted in determining appropriate solutions
- Y WPM project managers aim to blend into the Client organisation so that there is no distinction between WPM and Client Project Managers; our people treat your business with the importance that they treat our own

Method

Project Manager Placements are successful when the right level and type of Project Manager is assigned to match the Client's environment and culture. WPM capture key requirements relating to the assignment to determine a profile for the type of Project Manager required. Normally, a selection of CVs will be submitted to the Client.

WPM's Project Manager will work under the Client's instruction:

- Y The Hiring Manager will allocate specific project(s) to the Project Manager
- Y The Project Board or Sponsor for the project will direct the Project Manager regarding the requirements for the project and the resolution of any issues that would take the project outside of agreed tolerance
- Y At the end of the placement the WPM Project Manager will ensure there is a controlled handover of the project (should it still be in progress) and produce an assignment report for the Hiring Manager.

Deliverables

- Y A Project Manager equipped with a laptop computer and mobile phone.

Reporting & Reviewing

- Y The Project Manager will issue Highlight Reports to the Client's Project Board at the frequency defined in the PID and produce a monthly report to the Hiring Manager.
- Y The Project Manager will also issue standard weekly reports to the WPM Operations Manager.
- Y The WPM Operations Manager will have a performance review with the Hiring Manager within the first month of the placement and one review with the Hiring Manager at the end of the placement.
